Roundup

WR 47-86

Nov. 26, 1986

The Foreign Agricultural Service of the U.S. Department of Agriculture today reported the following developments in world agriculture and trade.

GRAIN AND FEED

EUROPEAN COMMUNITY Sells Wheat to BRAZIL. The European Community (EC) sold 125,000 tons of wheat to Brazil during the past two weeks; this compares to 51,000 tons for all of 1985/86 (July/June). Sales of 25,000 tons on October 30 and 100,000 tons on November 12 were made for \$73.45 per metric ton, free on board (FOB), and \$76.70-77.25 per ton, respectively, and are scheduled for December/January delivery. Since Brazil is committed to import 2 million tons under long-term trade agreements with Canada and Argentina out of a projected 3-million-ton total for 1986/87 (July/June), EC shipments may displace U.S. wheat shipments, which are currently forecast at 1 million tons.

AUSTRALIA Sells Wheat to CHINA. Australia has sold 1.5 million tons of wheat to China for delivery between January and May 1987. This sale continues the recent upward trend in Australian wheat exports to China, which have virtually doubled from a 5-year average (1980/81-1984/85) of 1.4 million tons to the 2.7 million tons shipped in 1985/86 (July/June). Meanwhile, U.S. wheat exports to China have declined steadily from a peak of 8.7 million tons in 1980/81 (July/June) to 541,000 tons in 1985/86 (July/June), a 95-percent reduction.

TAIWAN Signs Corn Agreement with SOUTH AFRICA. South Africa has agreed to supply Taiwan with 1.8 million tons of corn from January 1987 through December 1989. The return of South Africa to Taiwan's corn market may displace U.S. corn since the United States supplied virtually all Taiwan's corn for the past few years. Over the past three years, despite a similar agreement, South Africa was out of the export market because of poor crops while the United States provided Taiwan with about 3 million tons per year. When South Africa was last a major supplier (1981/82), U.S. exports were only 1.7 million tons.

OILSEEDS AND PRODUCTS

U.S. Exports of Sunflowerseed to PORTUGAL Down. According to the head of Portugal's crushers association, no exports of U.S. sunflowerseed to Portugal are likely through March. The displacement of U.S. sunflowerseed by EC product (mostly French) is due principally to EC crushing subsidies. The U.S. agricultural attache in Lisbon reports that EC suppliers also can provide sunflowerseed in smaller lots which is advantageous to certain Portuguese crushers. This means that small lots of 2,000 to 3,000 tons per month can be purchased from the EC instead of 10,000-12,000 metric ton shipments from the United States. Portugal imported 205,000 tons of sunflowerseed from the United States in 1984, 100,000 tons in 1985, and is expected to import substantially less in 1986.

DAIRY, LIVESTOCK AND POULTRY

SOVIET Livestock Production Up. The U.S. agricultural attache in Moscow reported that meat production on state and collective farms in the USSR for January-October was 7 percent above the same period in 1985. Beef production was reported up 7 percent while pork increased 6 percent; a 10-percent increase was reported for poultry meat. Milk production rose 5 percent as a 6-percent increase in productivity more than offset a small decline in cows. Egg production was reported to be 7 percent above January-October 1985.

Cattle on state and collective farms on November 1 numbered 95.9 million head, 1.3 million above 1985. Cows were reported at 29.0 million head, down 0.3 million head. Hog numbers, at 62.2 million head, were 2.4 million above last year. Poultry numbers were essentially unchanged from year-earlier levels.

U.S. Beef Dominates Recent JAPANESE Beef Tender. U.S. grain-fed beef accounted for the bulk of the Japan Livestock Industry Promotion Corporation's (LIPC) recent Simultaneous Buy and Sell (SBS) imported frozen beef tender of 6,633 tons. The U.S. share of these purchases has varied from 58 to 92 percent since the system began in 1985. The following table provides details on SBS tenders over that period. The SBS system allows buyers and suppliers to communicate directly in deciding product specifications and other transaction details which helps to tailor U.S. product to Japanese meat industry requirements that do not necessarily coincide with those of LIPC. LIPC, which controls 90 percent of all Japanese beef imports, allocates 10 percent of its annual beef quota to SBS. Japan is the major U.S. export market for high-quality beef, consistently taking over 75 percent of total U.S. exports.

COTTON AND FIBERS

TURKEY Increases Import Surcharge on Cotton. The U.S. agricultural attache in Ankara reports that Turkey raised its customs tariff from \$1 to \$100 per metric ton for short and medium staple cotton. USDA data show no Turkish cotton imports for the 1960-1984 marketing years (MY). Some imports were reported toward the end of MY 1985, although none from the United States. However, U.S. export sales data show accumulated exports of 14,000 running bales to Turkey as of November 13 with outstanding sales of 26,500 running bales. During the week of November 7-13, Turkey was the major purchaser of U.S. cotton.

CREDIT NOTES

GSM-102 Actions Announced for IRAQ, JORDAN, CHILE and BRAZIL. USDA made an additional \$15 million available so Iraq can buy more U.S. rice. Jordan's \$55 million in credit guarantees will permit that country to buy wheat, rice and feed grains. Chile received \$50 million in guarantees so it can purchase U.S. wheat and feed grains. USDA activated \$20 million of Brazil's \$380 million in credit guarantees so Brazil can satisfy immediate wheat import needs.

GSM-103 Actions Announced for IRAQ and CHILE. USDA made available \$12 million in credit guarantees so Iraq can buy U.S. tobacco. Chile's program is for \$3 million worth of breeding livestock.
